COMPANY PROFILE

Founded in 2002, listed on Shenzhen stock market in 2012, Mason has achieved honors as one of China's Top 10 most international competitive LED manufacturers.

For all these years, we have been focus on R&D and production of high power LED lightings, with more than 300 R&D engineers and 2000 workers, making our annual output value exceeds 150 million.

Located in Dongguan province, our production base of more than 100,000 square meters, and a strong business network in home and abroad. Offer our clientes a fast and efficient service.

We believe in light, we believe in future.

20⁺
20 years history
of LED research and
development production

100⁺
Company's products sell
well in more than 100 countries and
regions at home and abroad

300⁺
300 people of engineering
research and development
technical team

460⁺
Owns more than 460
multiple national patents

160,000⁺
About 160,000 m²
building area

100,000⁺

ZIGBEE CONTROL SERIES

1. 2700K / 6500K two types of LED / RGBW four types of LED
2. 802.15.4 ZigBee communication protocol
3. Dimming and change CCT / Color by APP
4. With timing function
5. Setting group and various scenes
6. Multi voltage 100-240V 50~60Hz
7. 40,000 hours lifetime

SCHEMATIC DIAGRAM OF HOME INTELLIGENT CONTROL

Photoelectric+Microwave Motion Sensor 2 in 1

1. The 2-in-1 sensor is more sensitive and reliable than other sensors. It would not be incorrectly turned on by moving objects during the daylight due to the photoelectric part working as priority
2. It's easy to install, providing high probability of detection, low nuisance alarms and resistance to rain, fog, wind, dust, falling snow and temperature extremes
3. It can maximize detection performance and minimize interference from external radar sources. The detection zone could reach 15 meters distance
4. The delay time (5s-60 mins) could be programmed as you wish
5. Lower Standby power consumption
6. Auto turn off in daytime

With sufficient ambient light, the sensor does not switch on the lamp.

With insufficient ambient light, the sensor switches on the lamp when motion is detected.

After hold time, the sensor dims the lamp at a low light level if no new motion trigger.

After stand-by period, the sensor switches off the lamp if no motion is detected in its detection zone.

With sufficient light, the lamp doesn't switch on.

With insufficient ambient light, then sensor switches on the lamp when motion is detected.

After hold time, the sensor switches off the lamp when no motion is detected.

iSense Smart Control System

The iSense Bluetooth intelligent control system with two kinds network set-up methods: one is mobile phone direct connect or communicate with the the control nodes, another method is throught the mobile/PC connect the gateway, then connect to the single control node.

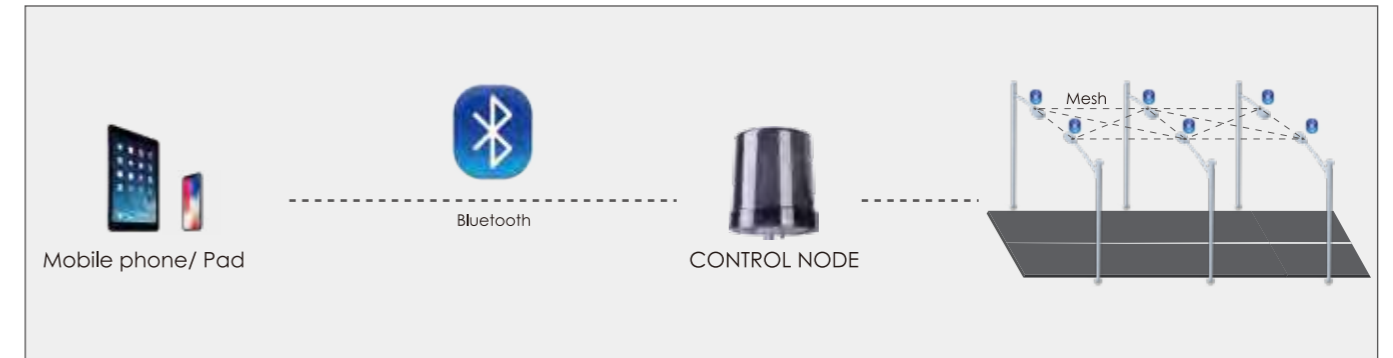

Features of mobile phone direct control: no need the gateway, mobilephone connect to the nodes through bluetooth signal, easy to operate, fast, safe and flexible.

Features of the with gateway control : Gateway integrated into the control node, no extra central controller required(can save total barget), gateways connected each others by mesh network, If one of the gateways fails, the system automatically switches the alternative gateway to ensure the normal operation of the system.

Account management : with a multi-level rights management, managing multiple areas with different gateway configurations, and securely access control and configuration functions.

(Close field mobile direct connect and control)

(Long distance connect through gateway)

Bluetooth solution | CHARACTERISTICS

Electrical parameters

Work voltage	NEMA 85-305VAC / ZHAGA 12V
Work temperature	-40° ~ +85°
Input frequency Range	47HZ-63HZ
Surge protection:	L-N:10KV
Dimming	0-10V
Standby power	<2W

Wireless communication parameters

Communication mode	Bluetooth 5.0 low energy and above
ISM band	2.4GHz
Transmitting power	< 19dbm
Communication distance	< 400M
Group control technology	BLE+MESH

Operating system parameters

Operating system	Android version 5.0 and above
	iOS version 10.0 and above
Display resolution	720x1280 and above

Security considerations

Communication Security technology	AES CCM encryption
Account security management	Customer access key

Certification qualification

Compliance criterion	CE/ROSH
	BQB

SMART LIGHTING POLE

Smart city is a new concept of urban development. It is a new method to promote the transformation of government functions and promote social management innovation. The goal is to make the infrastructure more intelligent, public services more convenient, social management more refined, ecological environment more livable, and the industrial system more optimization.

Smart management is to use a new generation of information technology to perceive, monitor, analyze and integrate urban resources, and to respond quickly, flexibly and accurately to various needs including people's livelihood, environmental protection, public safety, urban services, industrial and commercial activities, etc. The public creates a green and harmonious environment and provides a wide range of convenient and efficient services.

As an important part of a smart city, the Smart light pole is one of the public service infrastructures of smart cities. It is of great significance to integrate it better into the tide of smart city construction. The smart light pole is a multi-dimensional complex system integrating the Internet of Things, cloud computing and big data. It has the functions of a new urban lighting system, and integrates communication base stations, video surveillance, Led advertising screens, broadcasting, WIFI, one-touch calling, and charging piles new public service infrastructure.

Intelligent lighting

Realize remote control switch lights on and off, dimming, energy consumption statistics, fault alarms, etc.

Weather station

Small weather environment monitoring station that can monitor various environmental data such as temperature, PM2.5, PM10, etc.

WIFI

WIFI convenient Internet access, user analysis, etc.

RFID

Electronic label, fixed asset management, location tracking, etc.

Advertising screen

Advertising operations, government promotion, emergency information release

Broadcast

Emergency broadcast, announcement, background music, citizen entertainment, etc.

Manhole cover inspection

Manhole cover opening warning, unusual action alarm, inspection management, etc.

SMART LIGHT POLE

Function

- Signal light
- Indicator
- Electronic police
- Charging pole
- Scene mode
- RFID
- Sensor
- Water level monitoring
- WIFI
- 5g base station
- LED Screen
- One button alarm + walkie-talkie
- Information broadcast
- Environmental weather monitoring
- Noise monitoring
- Illegal Parking monitoring
- Red light breaking monitoring
- Traffic flow monitoring
- People flow monitoring
- Face recognition
- Camera
- Intelligent Lighting

Basic Function Optional Function

We believe in light

LED STREET LIGHT

www.masonleds.com

LAMIS SERIES

LED STREET LIGHT

20W-200W

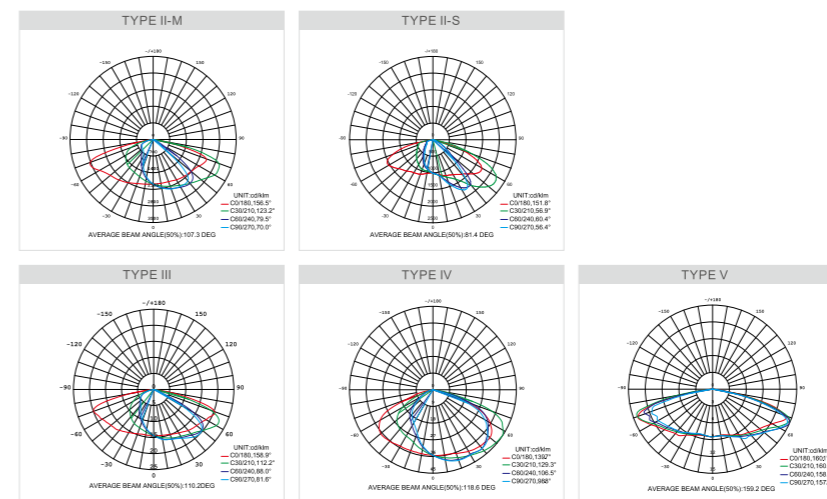

Features

1. lamis series provide wide wattages range from 20W to 200W with five sizes and different power.
2. Integrated lamp arm with diameter $\phi 60\text{mm}$. Pads can be added for smaller size (Micro $\phi 50\text{mm}$).
3. Interface with light control holes, can be equipped with 3-7pin light control.
4. Integrated lens, luminous efficiency up to 180lm/W.
5. Inherit ORO style, more economical.
6. Upper open cover lamp fixture.
7. Upper cover and electrical parts can be quickly removed and replaced.
8. Auto power disconnection switch can be optional.
9. Type 2, type 3, type 4, type 5 of lens can be optional.
10. 3030, 2835, 5050 of light source can be optional.
11. Light and electric separation structure, lower temperature, longer life.
12. With bars on the back for better heat conduction.

Application

Collector road, Local road, Residential road, Country road

Technical parameter

Model No.	System Power	Luminous Efficiency	Structure Description	Product Size(L*W*H)mm	Weight(kg)
Lamis Micro	20W-50W	180lm/W	Die-casting aluminum	430*185*87	3.6
Lamis Mini	60W-100W	180lm/W	Die-casting aluminum	510*229*96	4.6
Lamis Midi	110W-150W	180lm/W	Die-casting aluminum	570*265*96	5.6

LINOS SERIES

LED STREET LIGHT

20W-300W

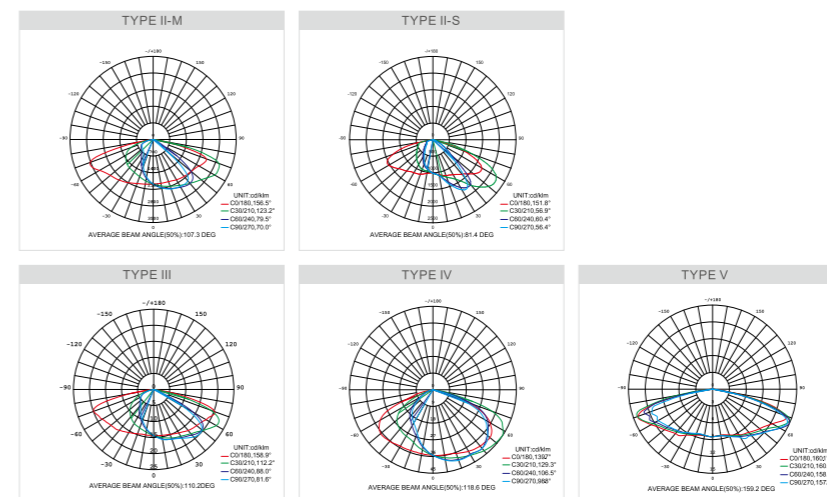

Features

1. LINOS street light, from 20W to 300W, designing five structures.
2. Optional light control 3/5/7 PIN NEMA receptacle and the infrared sensor.
3. SKD solution, Lenses, Glass, Upper Cover, Electrical parts etc, quickly assembly.
4. Standard adjustable spigot 60mm for the whole LINOS Series.
5. Tool-less access to the driver room by opening the upper cover.
6. 50*50mm Lenses, optional light source of 2835/3030/5050 etc, max. 190lm/W.
7. 6 in 1 or 8 in 1 lenses, with different light distribution type2/3/4/5.
8. Independent electrical compartment and light source unit, lower temperature and longer lifetime.
9. The light back is smooth designed, with self-cleaning function.
10. The spigot is adjustable $\pm 20^\circ$ and 2.5° per step.
11. Standard version with gradienter for installation.
12. The driver room well fit with both Class I and Class II LED driver.
13. Optional the single light controller, Zhaga standard LED module and power disconnection switch.

Application

Collector road, Local road, Residential road, Country road

Technical parameter

Model No.	System Power	Luminous Efficiency	Structure Description	Product Size(L*W*H)mm	Weight(kg)
Linus Micro	20W-50W	160-190lm/W	Die-casting aluminum	535*202*104mm	4.6kg
Linus Mini	60W-100W	160-190lm/W	Die-casting aluminum	645*255*104mm	5.6kg
Linus Midi	110W-150W	160-190lm/W	Die-casting aluminum	695*280*104mm	6.6kg
Linus Big	160W-220W	160-190lm/W	Die-casting aluminum	750*305*104mm	8.6kg
Linus Maxi	230W-300W	160-190lm/W	Die-casting aluminum	810*330*110mm	10.6kg

ORO SERIES

(MICRO, MINI, MIDI)

LED STREET LIGHT

20W-130W

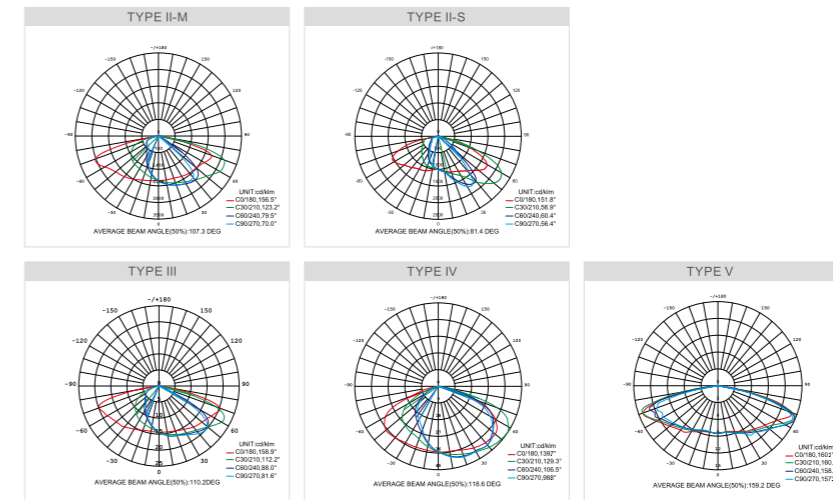

Features

1. Standard lumen efficiency: 160-190lm/W
2. High light transmittance tempered glass
3. UV protection PC lens
4. Integarted die-casting heat sink
5. Curvy design (Self cleaning system to get rid of any accumulation of dirt on the surface)
6. Surge protection (optional 10kV or 20kV)
7. Multiple control methods and sensor devices available
8. Easy installation.

Application

Collector road, Local road etc

ORO SERIES

LED STREET LIGHT

100W-170W

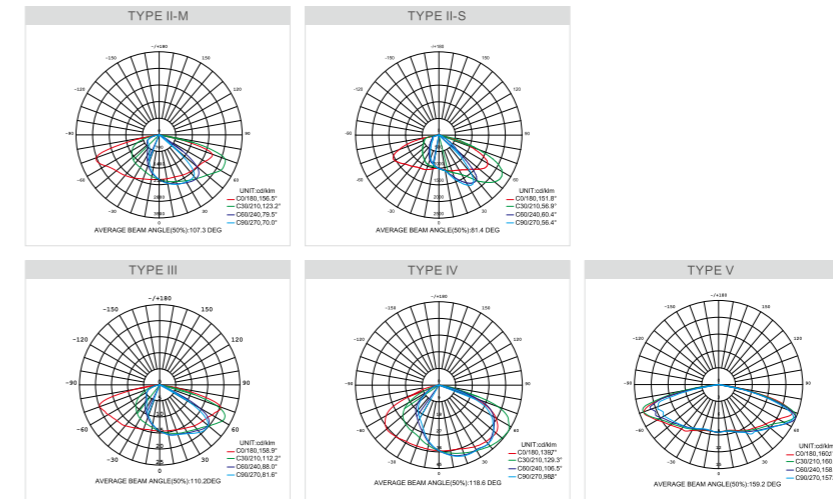

Features

1. High water proof level: IP66
2. Impact resistance: IK08
3. Robust structure design, ensure the stability
4. High Light transmittance tempered glass, better protection for lens part and long time, low light output depreciation
5. Tool-free access to electrical parts, convenient for installation and maintenance
6. Automatic power disconnection switch for higher electrical safety
7. Support side entry and post top installation, tilt angle $\pm 15^\circ$
8. Wide voltage range AC100-277V for global application

Application

City expressway, Major road, Collector road, Local road etc

VINCI SERIES

LED STREET LIGHT

20W-180W

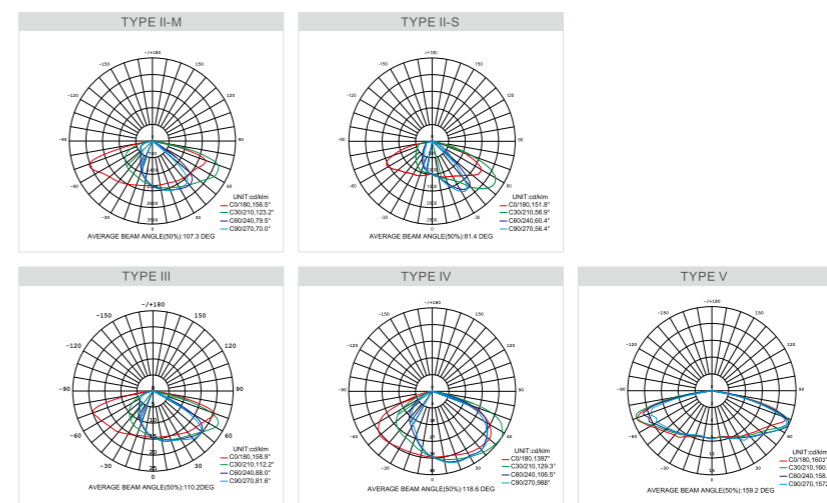

Features

1. Die-casting aluminium housing, with IP66 enclosure protection level (IEC 60529) degree.
2. Mechanical strength : IK 08 , IEC 62262, impact energy: 5J.
3. With high transparent clear glass, 4mm tempered glass.
4. Tool free open driver compartment, internal electronic parts modular designed for easy maintenance.
5. Modular designed LED+PCB, 4 in1 integrated optical lens, comply with ZHAGA standard.
6. CLASS I and CLASS II luminaries optional, with multiple functions quality driver, significant energy savings and a reduction of greenhouse gas emissions can be achieved.

Application

Roads, Parking lots, Roundabouts, Pedestrian, Bicycle paths, Pedestrian crossing.

FALCON SERIES

LED STREET LIGHT

20W-100W

Features

1. NEMA standard interface light control holes can be equipped with light control
2. The back is smooth and not easy to accumulate dust
3. Lamp Arm Fit: 42 - 60 mm
4. Water tight level: IP66
5. Mechanical impacts protection rate: IK10
6. 10KV surge protection

Application

Collector road, Local road, Residential road, Country road

FALCON SERIES

LED STREET LIGHT

110W-150W

Features

1. NEMA standard interface light control holes can be equipped with light control
2. The back is smooth and not easy to accumulate dust
3. Lamp Arm Fit: 42 - 60 mm
4. Water tight level: IP66
5. Mechanical impacts protection rate: IK10
6. 10KV surge protection

Application

Collector road, Local road, Residential road, Country road

COLUMBUS-I SERIES

LED STREET LIGHT

20W-100W

Features

1. Brand LED light source and driver, ensure the performance and quality
2. Die casting housing, high efficiency and modular design on optic lens part
3. Wattages cover 20W to 100W
4. Built-in driver and SPD
5. NEMA standard receptacle optional
6. Can be modified to use with solar system

Application

Country road, Collector road, Local road, Residential road

TITAN SERIES

LED STREET LIGHT

30W-330W

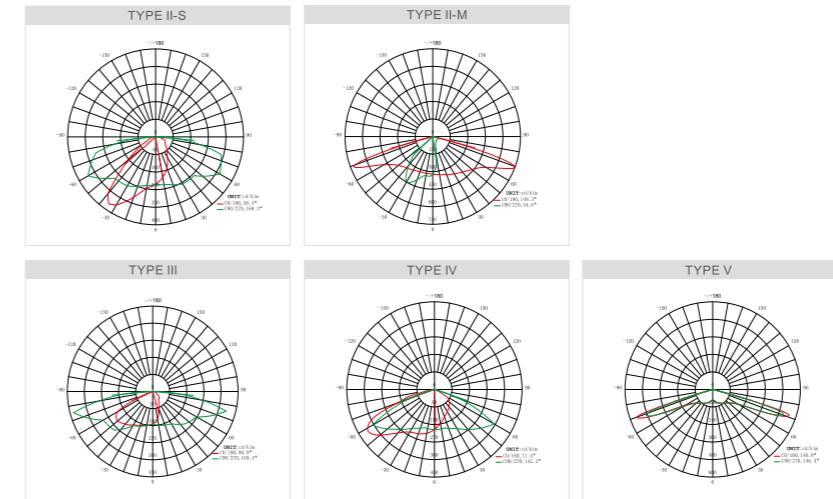

Features

1. Die-casting driver compartment and high purity aluminum for light source heat sink
2. Enclosure protection level: IP66. Impact resistance level: IK08
3. Independent compartment design
4. Various installation adaptors available
5. Different lens for different light distributions optional
6. NEMA standard twist lock receptacle optional
7. Optional motion sensor

Application

Parking lot, Stadium, Tennis court, High mast, City expressway, Major road, Collector road, Local road etc

VITRO SERIES

LED STREET LIGHT

20W-200W

Features

1. CREE/LUMILEDS/OSRAM original high-power LED is selected, which fully ensures the light color stability and light pass maintenance rate of the lamp.
2. The international famous brand special driving power supply for high-power LED street lamps has been adopted, and the reliability and stability of lamps have been greatly improved through various certifications.
3. The secondary light distribution design with independent intellectual property rights can improve the efficiency of lamps and make the distance-height ratio of lamps reach 1: 4; Optical lenses with high light transmittance make lamps more efficient.
4. Innovative rib-type heat dissipation design makes full use of the surface area of the lamp body and has better heat dissipation effect.
5. Unique design, lighter lamps, increase the safety of use.

Application

Urban Secondary Road, Branch Road, Rural Road, Park Landscape Road, Commercial Residential Road.

ZIBER SERIES

LED STREET LIGHT 20W-200W

Features

1. CREE/LUMILEDS/OSRAM original high-power LED is selected, which fully ensures the light color stability and light pass maintenance rate of the lamp.
2. The international famous brand special driving power supply for high-power LED street lamps has been adopted, and the reliability and stability of lamps have been greatly improved through various certifications.
3. The secondary light distribution design with independent intellectual property rights can improve the efficiency of lamps and make the distance-height ratio of lamps reach 1: 4; Optical lenses with high light transmittance make lamps more efficient.
4. Unique design, High efficiency LED components, increase the safety of use; High-strength tempered glass mask makes lamps easier to clean and optical devices more durable.
5. Support side entry and top post install, fixture angle adjustable, for side entry, ±10°, top post, 0~20°.

Application

Urban Secondary Road, Branch Road, Rural Road, Park Landscape Road, Commercial Residential Road.

LED FLOOD LIGHT

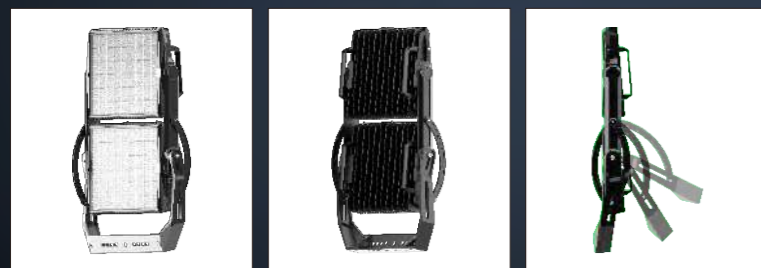

www.masonleds.com

PHANTOM SERIES

LED FLOOD LIGHT

400W-1200W

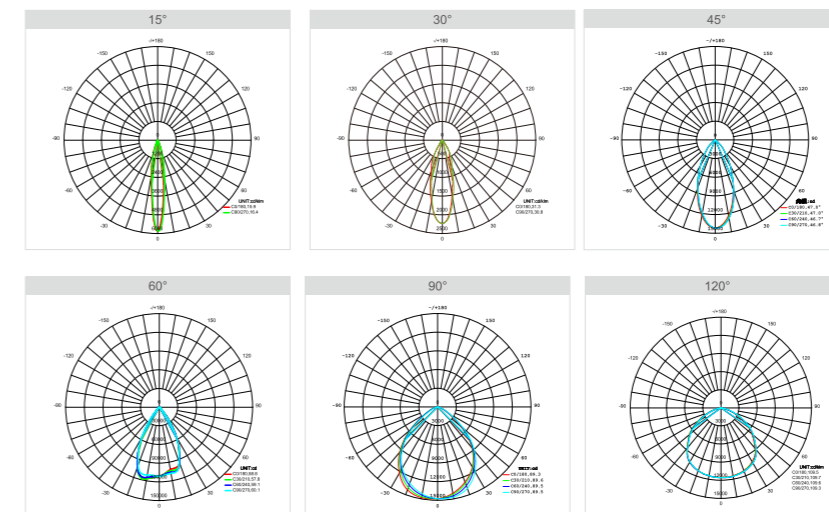

Features

1. Light source: CREE/PHILIPS/OSRAM original high-power LED is selected, which fully guarantees the stability of the light color and maintenance rate of luminous flux.
2. Driver: Adopted the world-wild branded driver, the reliability and stability of the lights have been greatly improved.
3. Light distribution: Patented secondary light distribution design, with multiple angles to meet the needs of different places.
4. Heat dissipation: The radiator adopts a cold forging manufacturing process to ensure the LED has a good performance in heat dissipation, and the temperature rise is within the design range. Appearance: The novel and unique design to make a excellent visual and physical texture.
5. Structure: Modular design is adopted to meet the needs of different powers of customers.
6. Control System: Receptacle/ dimming/ remote control interfaces is reserved, which can easily realize various controls.
7. Protection: 5mm thick tempered glass is used to reach the impact protection level IK08, and the waterproof protection IP66.

Application

Golf courses, football fields, other outdoor courts, ports, airports, entrances and exits of railway

MASTER SERIES

HIGH POWER MODULAR LED FLOOD LIGHT

80W-960W

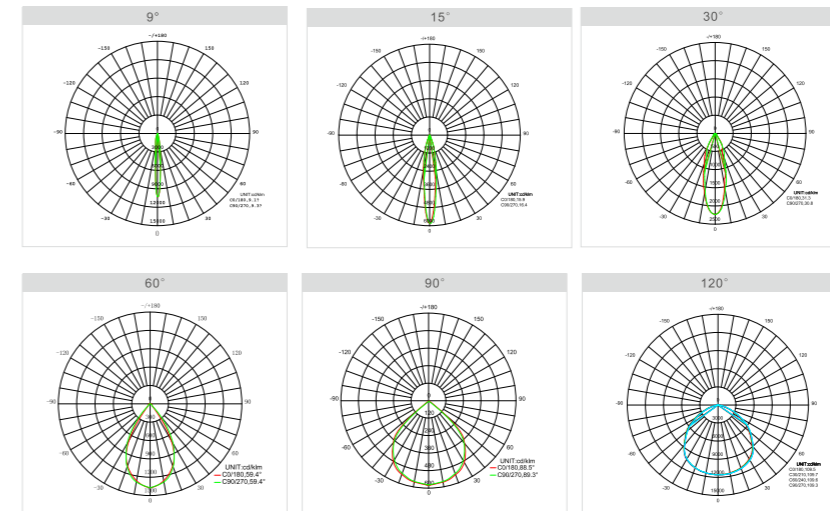

Features

1. Professional optical design, precise light distribution, low light glare
2. 80W/module, 80W-960W available Replace traditional 150W-2000W light fixture
3. 9°, 15°, 30°, 60°, 90°, 120° beam angle available
4. Philips / Meanwell driver, Cree / Osram / Lumileds led, 5 years warranty
5. High Light transmittance tempered glass
6. UV Protection PC lens
7. High purity aluminium&die-casting aluminium
8. Pure aluminium cold forging technology + anodic oxidation (more safety)
9. Low luminous decay LEDs: Zero decay within 3,000 hours and less than 30% after 50,000 hours
10. Compact design, module size: 150mm*150mm, module weight: ≤ 1.5KG/module.
11. Replaceable modular design.
12. CE, SAA certificate (UL, ETL, VDE under applying)

Application

Stadium, Construction, Highmast, Tennis court, Football court Plaza, airport, Port, highway crossroad, Theater, Airportterminal, Gymnasium, Railway station, Warehouse, Parking lot, Tennis court, Football court, Courtyard etc.

TITAN SERIES

LED FLOOD LIGHT

30W-330W

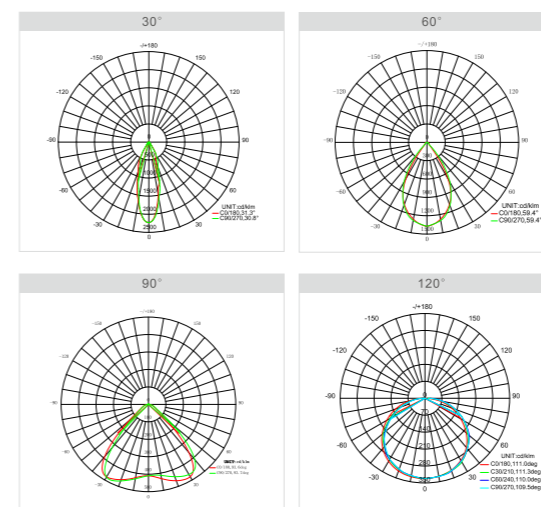

Features

1. Up to 145 lm/W
2. High purity aluminium material
3. Modular design on optic part
4. Lumileds or Osram LED chip
5. Original Meanwell HLG driver
6. 0-10V dimming / DALI dimming / PMW dimming / Timing dimming optional
7. Motion sensor / Photo sensor / Infrared sensor available
8. PLC / ZigBee system available

Application

Tunnel, Building, Warehouse, High Mast, Garage, Gas station etc

ARES SERIES

LED FLOOD LIGHT

10W-300W

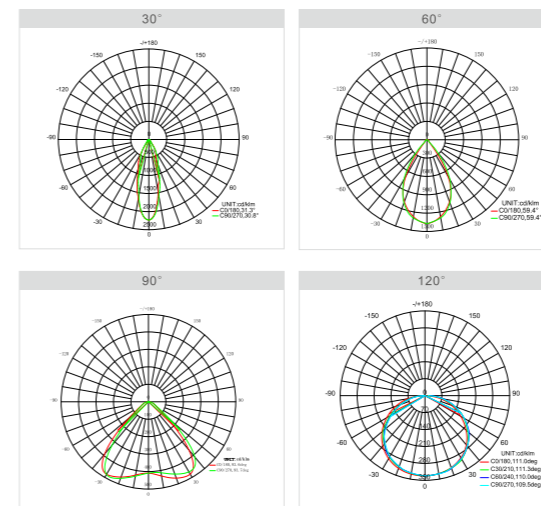

Features

1. Die casting aluminum casing, tempered glass cover.
2. Integrated design, compact structure.
3. High efficiency, 150lm/W-180lm/W available.
4. IP66.
5. Lens angle includes 30°/60°/90°/120°/T2M/T3M

Application

Tunnel, Building, Warehouse, High Mast, Garage, Gas station etc

LED HIGH BAY

www.masonleds.com

Features

1. Die casting aluminium housing .
2. 3 different beam angles for whole fixture through refraction, 60°, 90°, 120°.
3. Mason own design and toolings.
4. Compact design and space saving.

Application

Building, Warehouse, Factory, Workshop, Super market etc

LUNA SERIES

LED HIGH BAY

100W-200W

Features

1. Die casting aluminum housing.
2. Perfectly suitable for logistical centers, warehouses.
3. Beam angle optional: 60° ; 90° ; 120°
4. Unique style, mason own design.
5. Branded LED driver and LED components
6. Easy to install, fast replacement.
7. Flexible solutions for different efficiency and lumens output.

Application

Warehouse, Workshop, Garage, Stadium, Supermarket, Hall and other indoor public/private places.

EMERGENCY VERSION

Features

1. Up to 3 hours rated duration.
2. Built-in non-replaceable Li-Ion battery pack.
3. Over-charge, over-current, short-circuit and deep discharge protection for battery.
4. For maintained or non-maintained emergency lighting systems.
5. Wired between LED module and LED driver via water-proof connector.
6. Suitable for use in luminaires for high-risk task area lighting.

Application

Warehouse, Workshop, Garage, Stadium, Supermarket, Hall and other indoor public/private places.

Battery Pack Options

LED TRI-PROOF LIGHT

www.masonleds.com

ESTE SERIES

LED TRI-PROOF LIGHT

20W-45W

Features

1. Simple and stylish design
2. PC cover + Aluminium housing design, Innovative module connection options, high protection rating, quick and simple Installation
3. High quality LED light source, with high light efficiency
4. High protection rating IP65/IK08, uniform light output, easy mounting, available in various application and working condition
5. Microwave sensor, Bluetooth, DALI/0-10V control, emergency lighting, with different smart additional function modules for options

Application

Suitable for Gallery, factories, schools, supermarket, office buildings etc. different application lighting.

Technical parameter

ARMAS SERIES

LED TRI-PROOF LIGHT

20W-50W

Features

1. Simple and stylish design
2. Modular and smart additional function design, with side entry or top entry cable connection, Simple and quick installation
3. High quality LED light source, with high light efficiency
4. High protection rating IP65/IK08, uniform light output, easy mounting, available in diverse application and working condition

Application

Suitable for Gallery, factories, schools, supermarket, office buildings etc. different application lighting.

OMNI SERIES

LED TRI-PROOF LIGHT

25W-65W

Features

1. Tool-free assembly
2. Waterproof Protection: IP65
3. Impact protection: IK08
4. With 3*1.5mm² go through wiring for series connection
5. Multi-function: Blue-tooth, motion sensor for choice
6. High efficient up to 140-160lm/W
7. 360° beam angle

Application

Widely used in all types of production line, parking lot, factory, shopping mall, and supermarket. It can replace traditional tri-proof lamp

Technical parameter

Model No.	System Power	Length(mm)	Luminous Efficiency	Weight(kg)
MS-LL0010625	25W	600mm	140-160lm/W	0.7

HALLEY SERIES

LED TRI-PROOF LIGHT

20W-50W

Features

1. Tool-free assembly
2. Waterproof Protection: IP65
3. Impact protection: IK08
4. With 3*1.0mm² go through wiring for series connection
5. Multi-function: Blue-tooth, radar sensor for choice
6. High efficient up to 160lm/W

Application

Widely used in all types of production line, parking lot, factory, shopping mall, and supermarket. It can replace traditional tri-proof lamp.

Technical parameter

Model No.	System Power	Length(mm)	Luminous Efficiency	Weight(kg)

PATRON SERIES

LED TRI-PROOF LIGHT

12W-80W

Features

1. Ingress protection: IP67 / IP68, IP69K (Suitable for hotwater washing)
2. Mechanical Strength: IK08-10
3. UV resistance
4. Ammonia resistance
5. Corrosion resistance

Application

Car washing yard, Parking lot, Meat processing, Farm,
Food processing yard, Low temperature storage room, Department store

PLATO SERIES

LED TRI-PROOF LIGHT

25W-45W

Features

1. Water-proof, dust-proof, impact-proof
2. One-batch forming thick Aluminium built-in PC pipe strong shock resistance and soft light
3. High quality waterproof gasket
4. Standard lumen efficiency: 140-160 lm/W
5. High light transmittance PC cover, uniformity, no darkness
6. Clip design on both sides, convenient for assembling and installation

Application

Wildly used in all types of production line, food plant, cool house, parking lot, factory, freight yard, shopping mall, and supermarket. It can replace traditional tri-proof lamp

Technical parameter

PLATO-SE SERIES

LED TRI-PROOF LIGHT

30W-50W

Features

1. Water-proof, dust-proof, impact-proof
2. One-batch forming thick Aluminium built-in PC pipe strong shock resistance and soft light
3. High quality waterproof gasket
4. Standard lumen efficiency: 140-160 lm/W
5. High light transmittance PC cover, good uniformity

Application

Wildly used in all types of production line, food plant, cool house, parking lot, factory, freight yard, shopping mall, and supermarket. It can replace traditional tri-proof lamp

IVETA SERIES

LED LINEAR LIGHT

36W-50W

Features

1. Simple and stylish design
2. Modular and smart additional function design, with side entry or top entry cable connection, Simple and quick installation
3. High quality LED light source, with high light efficiency
4. Uniform light output, easy mounting, available in diverse application and working condition

Application

Suitable for Gallery, factories, schools, supermarket, office buildings etc. different application lighting.
